DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claim 5 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The claim covers every conceivable structure (*programming the PSSU to be sliced; line 11*) for achieving the stated property (*such that its plural virtual slices are intermingled to provide effective uncrossings of ingress and/or egress signal lines of the PSSU; lines 11-13*) while the specification discloses at most only those known to the inventor.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claim 5 is rejected under 35 U.S.C. 101 because the claimed invention lacks patentable utility. The claim does not produce a useful, tangible and concrete result. The claim only claims a method of programming the PSSU to be sliced. The step merely manipulates numbers, signals, and abstract ideas that are not concrete or tangible.

Allowable Subject Matter

5. Claims 1-4 and 9-16 allowed.

Response to Arguments

6. Applicant's arguments filed September 6, 2006 have been fully considered but they are not persuasive.

Referring to the argument to the 101 rejection (page 3, line 6 to page 6, line 10):
The claim does not produce a useful, tangible and concrete result. The claim only claims a method of programming the PSSU to be sliced. The step merely manipulates numbers, signals, and abstract ideas that are not concrete or tangible. Although the useful, tangible and concrete result of the programming is explained in the specification paragraph [0020], the useful, tangible and concrete result of the programming is not claimed. The useful, tangible and concrete result of the programming must be claimed.

Referring to the argument to the 112 rejection (page 6, line 11 to page 7, line 15):
The example of the 4 bits and 16 possible configurations of the 4 bits do not apply to the invention. The example exhausts all the possibilities since it is a finite set. However, the claimed invention does not exhaust all the possibilities since the specification only discloses one of the possibilities.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Art Unit: 2616

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
